A

Brand identity

Who Svaraa is, how it sounds, and how it looks: the parts that stay the same on the pendant, the box, the app and every alert.

BRAND ESSENCE

A voice for the elder, a calm window for the family

svara स्वर · Sanskrit

Voice, tone, a musical note.

Svaraa is the voice an elder talks to and the calm window their family looks through. It keeps the day on time, keeps memories private and brings help fast, without asking the wearer to look at a screen.

BRAND LINE (PROPOSED)

A gentle voice.
A family close by.

Every decision in this deck serves one of four pillars.

Calm

No screen on the pendant and few words anywhere.

So we: Two-sentence replies, quiet badges, one action per alert.

Private

Each household's data lives on its own server.

So we: Say where data is, log every look, let the wearer's voice win.

Present

Family feels near without hovering.

So we: Voice notes over feeds, a daily digest over pings, safety that never waits.

Rooted

Faith, language and routine come first.

So we: Prayer times, Indian-language voices and festival calendars built in.

WHO WE DESIGN FOR

Two audiences: one hears and feels, one sees and acts

The wearer

HEARS AND FEELS

Amma, 74, Chennai · Tamil and English

MEETS SVARAA THROUGH	The pendant: voice, one gold button, vibration. Simple Mode on a tablet.
NEEDS	Short spoken answers, prayer on time, help when she falls, family voices.
DESIGN RULE	Every action gets a click she can feel and a sentence she can hear.
TYPE AND TARGETS	22 px base text · 64 px targets (Simple Mode).
SUCCESS LOOKS LIKE	Talks to Svaraa on 5 of 7 days.

The family

SEES AND ACTS

Priya, 42, Bengaluru · Ravi, 45, San Jose · Anjali, 17

MEETS SVARAA THROUGH	The web app on laptop and phone, push, SMS and calls.
NEEDS	One Today view, reminders that stick, an SOS that reaches them in minutes.
DESIGN RULE	Status first, then one primary action per problem.
TYPE AND TARGETS	16 px base text · 44 px targets.
SUCCESS LOOKS LIKE	Opens Today on 4 of 7 days; a drill is acknowledged in under 2 min.

PERSONALITY

Warm in tone, exact in facts

IN ONE LINE

Svaraa sounds like a patient companion who has known the family for years: respectful, unhurried, and precise about times and names.

Never: chirpy, clinical, alarming, preachy.

VOICE AND TONE

Three registers, one voice

Spoken

On the pendant

- At most two sentences.
- Name and honorific first.
- Numbers as words; dates relative ("this Tuesday").
- Ask a question only when a decision is needed.

EXAMPLE

"Good morning, Amma. Your blood-pressure tablet is at nine, after breakfast."

Written

In the web app

- Status first, then the action.
- Exact times and counts.
- Sentence case; no exclamation marks.
- Never blame the wearer.

EXAMPLE

Blood-pressure tablet not acknowledged · 1:00 pm dose · 40 min ago

Safety

Alerts and incidents

- Who, what, where, when, in that order.
- Plain verbs; never softened, never dramatised.
- One primary action.
- Never claim what has not happened.

EXAMPLE

Svaraa: Amma may have fallen at 2:52 pm at 12 Lakshmi Nagar 2nd St. Reply 1 if you are going.

WORDS WE USE

Say what is true, in the family's words

Say	Not	Because
Alerts your family after a hard fall	~~Detects medical emergencies~~	The hardware spec's marketing rule; Lite is not a medical device.
Your private server	~~The cloud~~	The privacy promise is concrete: one server per household.
Recording is on	~~Svaraa is listening~~	Say exactly what the pendant is doing; there is no light to show it.
Missed	~~Failed, non-compliant~~	A missed tablet is information, not a verdict on the wearer.
Amma (the chosen name)	~~The user, patient, senior~~	She is a person the family named, not a case.
Waiting for pendant	~~Error, sync failed~~	The pendant is usually just out of range; reminders still fire.
Help is on the way. I've told Priya.	~~Emergency services notified~~	V1 never calls emergency services itself; never claim it did.

The gold dot is the button

The mark is the pendant face seen straight on: eight outer petals, eight inner petals turned half a step, and the gold centre dot, the one control the wearer ever touches.

It reads three ways at once: a lotus, a mandala, and a sound ripple spreading out from a single press.

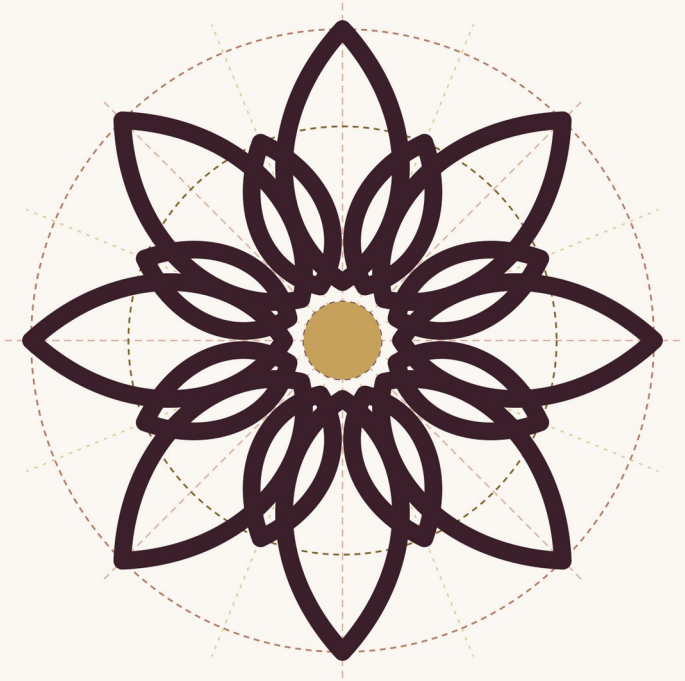

Small-size mark

Below 24 px: outer petals only, stroke doubled. Used for favicons and the top-bar logo.

Construction

Every proportion is a multiple of the dot, so the mark rebuilds exactly at any size.

x	dot radius	1.5x	petal base
5.5x	inner tips	8x	outer tips
0.45x	stroke	45° · 22.5°	petal steps

LOCKUPS AND CLEAR SPACE

Four lockups, one rule for space

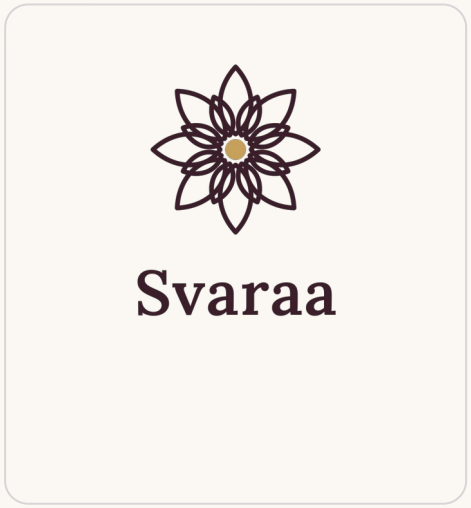

Horizontal · default on light surfaces

Horizontal · on aubergine, gold petals

x = radius of the centre dot · the mark is 16x wide

Stacked · box, splash, cover

Product · Svaraa Lite (Lato, rose gold 700)

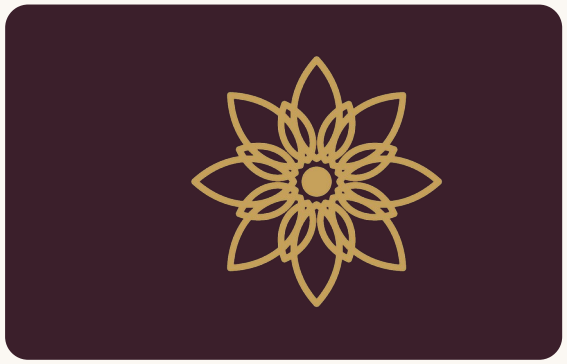

Minimum sizes

Mark	16 px screen · 6 mm print
Horizontal	24 px tall · 8 mm
Stacked	48 px tall · 15 mm
Product	28 px tall · 10 mm

Wordmark: Lora SemiBold, +2% tracking, never retyped; use the master files. On packaging, foil-stamp gold on aubergine.

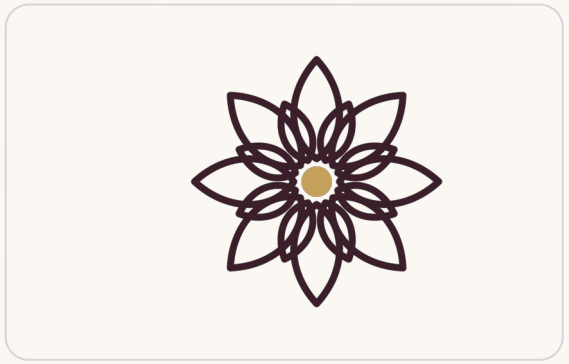

COLOURWAYS AND MISUSE

The lotus never glows: Lite has no lights

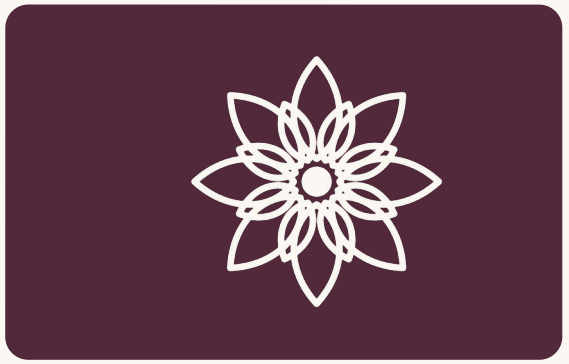

Gold on aubergine

Primary · app avatar, box, cover

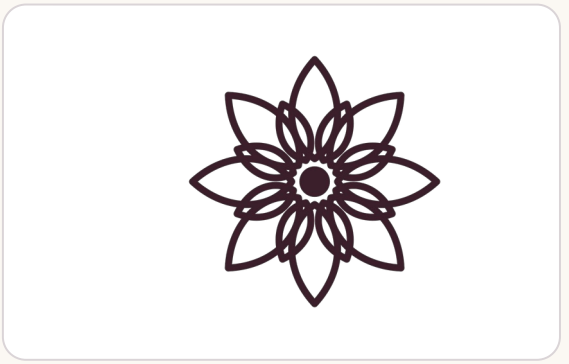

Aubergine, gold dot

Light surfaces · web, print

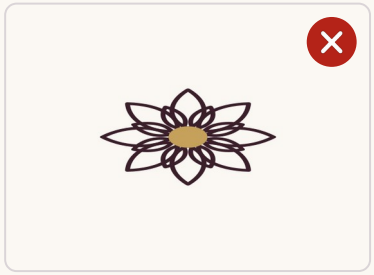

Cream

Over dark photography

Single colour

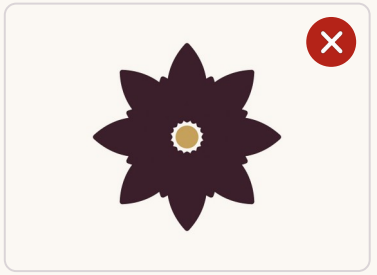

Emboss, fax-safe, one-colour print

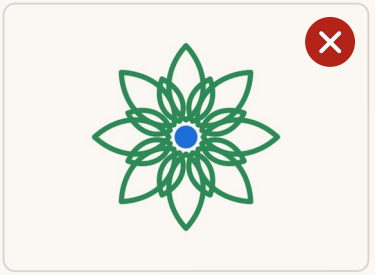

Don’t stretch or squash

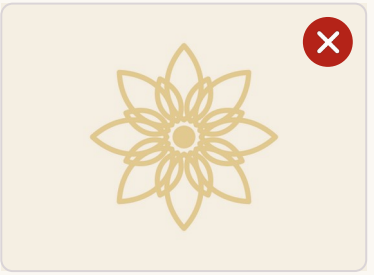

Don’t add a glow or light

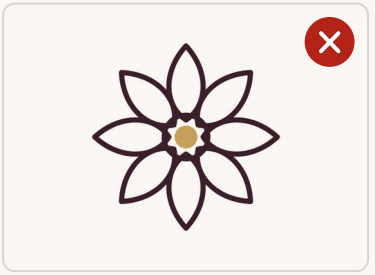

Don’t fill the petals

Don’t recolour

Don’t use low contrast

Don’t redraw or simplify

Also: never rotate the mark, place it on busy photography without a scrim, or set the wordmark in another typeface.

CORE PALETTE

Colours taken from the pendant itself

#FBF8F3

Cream 50

Canvas. The stone the pendant rests on; every light surface.

#3B1F2B

Aubergine 800

Brand and primary action. The pendant's face.

#B97A62

Rose gold 500

Warmth and memory: Recall, people, highlights. The bezel.

#C6A15B

Lotus gold 500

The mark and the spiritual: Prayer, Recite. Decorative on light.

#1C1A1F

Ink 900

Body text. A warm near-black, never pure black.

PROPORTION ON A TYPICAL SCREEN

Status colours (next slide) sit outside this budget and appear only when something needs attention.

SCALES AND STATUS COLOURS

Tints for surfaces; status colours only for state

	50	100	200	400	600	700	800	900	950
Aubergine	F8F2F4	EFE4E8	DCC7CF	9C6D80	6B3A4D	52293A	3B1F2B	2A1620	1C0F16

	100	300	500	700
Rose gold	F4E3DA	DDB09B	B97A62	8C5340
Lotus gold	F6ECD4	E2C98F	C6A15B	836427
Cream	FBF8F3	F5EEE3	EADFCF	D9CBB6

	100	200	300	500	600	700	900
Ink	EDE9EA	DAD4D7	B7AFB5	756D77	5A535C	3F3A42	1C1A1F

STATUS	Solid	Tint	Dark	
Good	28704F	E3F2EA	6FCF9F	Connected, taken, drill passed
Attention	9A5B0B	FCEFD9	F2B55C	Missed reminder, low battery, a decision
Safety	B42318	FDE7E4	FF8A7A	SOS, fall, incident. Nothing else is red.
Info	2C64A8	E4EEF9	8FB4E3	System notes, Bluetooth, links
World	6F93B8	DCE8F2	A9C4DE	World app tiles only (Health, News)

APPROVED PAIRINGS

Every text colour is checked against WCAG 2.2 AA

Sample	Text on background	Ratio	Use
Aa 9:00 am	#1C1A1F on #FBF8F3	16.3 : 1	Body text
Aa 9:00 am	#5A535C on #FBF8F3	7.0 : 1	Secondary text
Aa 9:00 am	#756D77 on #FFFFFF	5.0 : 1	Captions, placeholders (12 px and up)
Aa 9:00 am	#3B1F2B on #FBF8F3	14.0 : 1	Headings, links
Aa 9:00 am	#FBF8F3 on #3B1F2B	14.0 : 1	Primary buttons, dark panels
Aa 9:00 am	#C6A15B on #3B1F2B	6.1 : 1	The mark, accents on dark
Aa 9:00 am	#8C5340 on #FBF8F3	5.8 : 1	Inline actions ("Add reminder")

Sample	Text on background	Ratio	Use
Aa 9:00 am	#836427 on #FBF8F3	5.2 : 1	Spirit labels on light
Aa 9:00 am	#28704F on #FFFFFF	6.0 : 1	Good status text
Aa 9:00 am	#9A5B0B on #FCEFD9	4.8 : 1	Attention cards
Aa 9:00 am	#FFFFFF on #B42318	6.6 : 1	Safety buttons and banners
Aa 9:00 am	#2A1620 on #C6A15B	7.0 : 1	Simple Mode “Play” tile
Aa 9:00 am	#F5EEE3 on #1C0F16	16.1 : 1	Dark mode body text
Aa 9:00 am	#E2C98F on #1C0F16	11.5 : 1	Dark mode primary action

Never for text

Lotus gold 500 on cream (2.3 : 1) is decorative only: the mark, dividers, icons beside a label. Rose gold 500 on cream (3.3 : 1) is allowed only at 24 px and larger or for non-text shapes. Status meaning is never carried by colour alone: every state also has an icon or a word.

TYPEFACES

Lora for moments, Lato for work, Noto for every Indian script

Aa

Lora

DISPLAY AND HEADINGS

Regular 400 · SemiBold 600 · Italic

Good morning, Amma.

Greetings, app titles, onboarding, quotes. The same serif as the hardware spec.

Aa

Lato

INTERFACE AND BODY

Regular 400 · Semibold 600 · Bold 700

Pendant connected · 70% · 9:00 am

Everything people read to get something done. Tabular figures for times and battery.

அ अ

Noto Sans

INDIAN SCRIPTS

Devanagari · Tamil · Telugu · Kannada · Malayalam · Bengali · Gujarati · Gurmukhi · Odia

வணக்கம் அம்மா, மாத்திரை நேரம்

नमस्ते माँ, दवा का समय हो गया

Paired per script with Lato; one step larger with 1.6 line height.

All three are SIL Open Font License, free to embed in the app, the Gateway and print. Fallback stack: Lora → Georgia → serif; Lato → Noto Sans → system-ui.

TYPE SCALE

One scale, a larger step for Simple Mode

Token	Sample	Face	Web px (size / line)	Simple Mode px	Use
`type.display`	Good morning	Lora 600	**40 / 48**	48 / 56	Greeting, onboarding titles
`type.title-1`	Today	Lora 600	**32 / 40**	40 / 48	App titles (Today)
`type.title-2`	Pair the pendant	Lora 600	**24 / 32**	32 / 40	Brand moments, dialogs
`type.heading`	**Needs attention**	Lato 700	**18 / 24**	26 / 32	Section headings in apps
`type.body-lg`	Ravi arrives on 12 Oct	Lato 400	**18 / 28**	24 / 34	Summaries, companion replies
`type.body`	Blood-pressure tablet	Lato 400	**16 / 24**	22 / 32	Default text
`type.body-sm`	Seen 2 min ago	Lato 400	**14 / 20**	20 / 28	Metadata, table cells
`type.label`	**Mark taken**	Lato 700	**14 / 20**	20 / 28	Buttons, chips, tabs
`type.caption`	2:52:04 pm	Lato 400	**12 / 16**	not used	Timestamps, hints (the minimum)
`type.kicker`	**STEP 6 OF 13**	Lato 700 +8%	**11 / 16**	not used	Section kickers only

Indian scripts: one step up with line height × 1.15. Minimum text anywhere: 12 px; in Simple Mode: 20 px. Samples shown at half size.

Six families of tiles, one line-icon style

TILE FAMILIES

Care	Today, Reminders
Memory	Recall, To-do
Spirit	Prayer, Recite, Music
World	News, Health, Calendar, Connections
Home and device	Family, Pendant, About, Routines, Settings
Safety	Safety only: red is reserved

TILE CONSTRUCTION

- Squircle, corner radius 26% of the tile; 64 px on the desktop grid.
- Two-stop vertical gradient from the family colour; no gloss.
- Glyph 50% of the tile, 1.75 px stroke at 24 px, cream or aubergine for 4.5 : 1.
- Count badges are aubergine; only Safety may show red.

Line icons: Lucide set, 24 px grid, round caps and joins, never filled except status dots.

Every action gets a click you can feel and a sentence you can hear

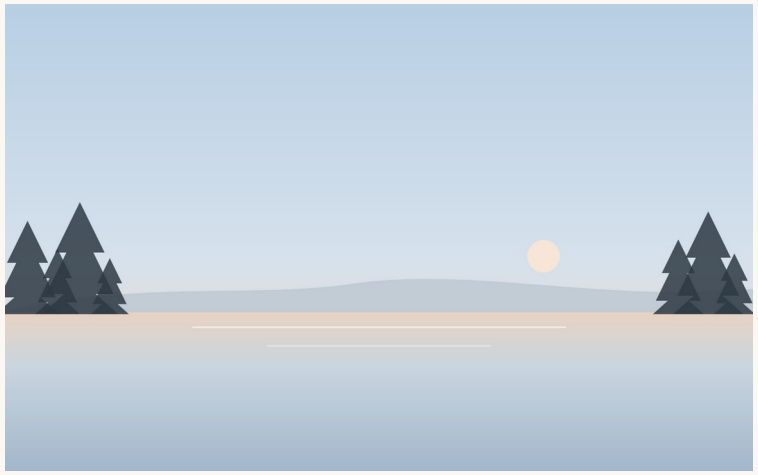

EVENT	HAPTIC PATTERN (0 TO 3 S)	SOUND	SPOKEN
Listening		—	(no words)
Reminder		Soft bell	*“Time for your blood-pressure tablet.”*
Recording		Rising chime to start, falling to stop, soft chime every 10 min	(chimes only)
SOS countdown		Spoken count	*“Calling for help in thirty seconds. Press me to cancel.”*
Help sent		—	*“Help is on the way. I’ve told Priya.”*
Phone out of range		—	*“I can’t reach your phone.”*
Charging		—	*“Charging, 40 percent.”*

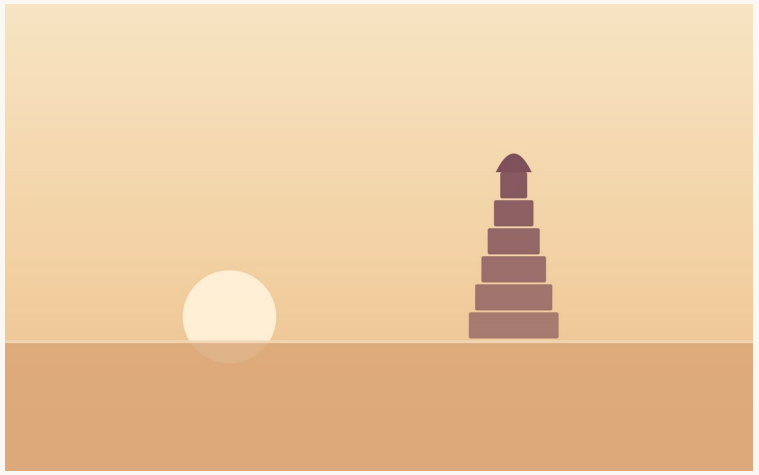

Chimes (proposed): one interval, a perfect fifth (sa–pa), rising to start and falling to stop, so the meaning needs no language.

Voice: warm, mid-pitch, 0.9× rate, 300 ms between sentences; one chosen voice per language across all AI providers.

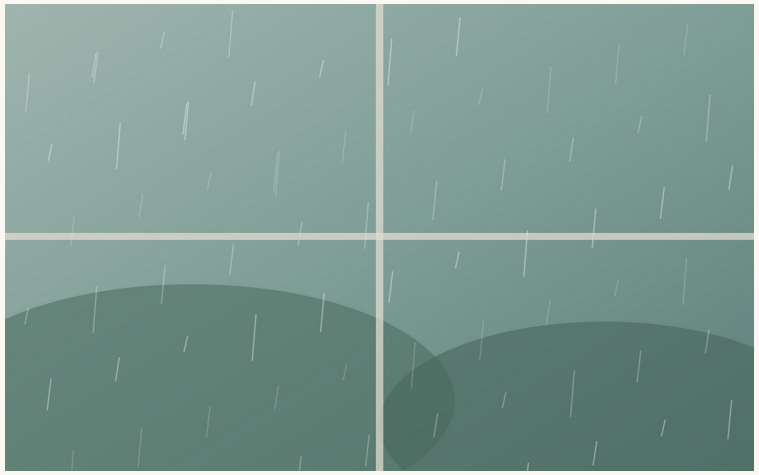

Mood, never information

Lake at dusk · default

Temple morning

Monsoon window

Photography: do

- Warm daylight in real Indian homes.
- Hands, the mala, the pendant being worn.
- Families together, or a call in progress.
- Elders active: cooking, praying, walking.

Photography: don’t

- Hospitals, drips or re-enacted falls.
- Elders shown confused or alone for effect.
- The wearer holding a screen (Lite has none).
- The lotus glowing or lit.

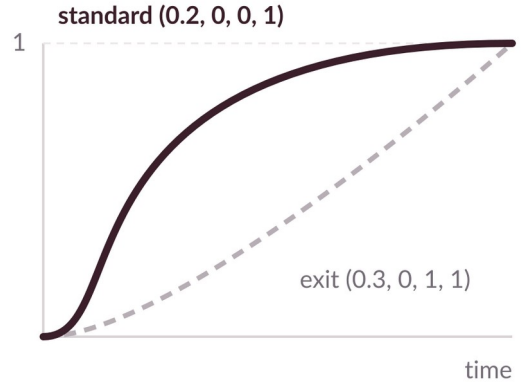

WALLPAPER RULES

- Three calm scenes ship; each has a night version for dark mode.
- Panels and tiles carry their own surfaces, so text never depends on the wallpaper.
- No faces, text or brand marks in a wallpaper.

MOTION

Slow enough to follow, never slow to respond

Token	Duration	Use
`motion.instant`	**0 ms**	SOS state, recording chip, pendant press feedback
`motion.quick`	**120 ms**	Hover, press, focus
`motion.standard`	**200 ms**	Chips, toggles, cards appearing
`motion.gentle`	**320 ms**	Panels, tabs, sheets, the app window
`motion.calm`	**2400 ms loop**	The breathing “working” dot

Easing

Standard cubic-bezier(0.2, 0, 0, 1) for everything entering; exit (0.3, 0, 1, 1) for anything leaving. No bounce, no spring.

Breathing dot

“Working on N things”: opacity 40% → 100% → 40% over 2.4 s.

Incident pulse

Incident tab and banner dot: a ring grows and fades every 1.2 s until someone acknowledges.

Sent to pendant

Chip changes “Waiting for pendant” → “Sent to pendant”, then fades after 4 s.

REDUCED MOTION

Loops become static, transitions become 120 ms fades, and the incident pulse becomes a solid red ring. Nothing flashes more than 3 times a second.

B

UI specification

Tokens, layout, components and the key screens of the Svaraa web app, ready to build against the V1 PRD.

COLOUR TOKENS

Semantic tokens: build with roles, never with raw hex

Token	Light	Dark	Use
sv.color.bg.canvas	#FBF8F3	#1C0F16	App canvas
sv.color.bg.surface	#FFFFFF	#2A1620	Cards, app windows
sv.color.bg.sunken	#EADFCF	#12090E	Segmented controls, wells
sv.color.bg.glass	#FFFFFF	#2A1620	Companion panel, top bar (80% + blur 30)
sv.color.bg.brand	#3B1F2B	#3B1F2B	Brand panels, hero
sv.color.text.primary	#1C1A1F	#F5EEE3	Body and headings
sv.color.text.secondary	#5A535C	#DCC7CF	Metadata, labels
sv.color.text.tertiary	#756D77	#9C6D80	Captions, placeholders
sv.color.border.subtle	#EDE9EA	#52293A	Dividers

Token	Light	Dark	Use
sv.color.border.default	#DAD4D7	#6B3A4D	Inputs, outlined buttons
sv.color.action.primary	#3B1F2B	#E2C98F	Primary buttons
sv.color.action.on-primary	#FBF8F3	#1C0F16	Text on primary
sv.color.accent.memory	#B97A62	#DDB09B	Recall, people, highlights
sv.color.accent.spirit	#C6A15B	#E2C98F	Prayer, Recite, the mark
sv.color.status.good	#28704F	#6FCF9F	Connected, taken
sv.color.status.attention	#9A5B0B	#F2B55C	Missed, low battery
sv.color.status.safety	#B42318	#FF8A7A	SOS, fall, incident
sv.color.focus.ring	#6B3A4D	#E2C98F	2 px ring, 2 px offset

Tokens ship as W3C design-tokens JSON and CSS custom properties (slide 40). Dark mode swaps values, never token names.

A 4 px base, soft corners, shadows only where things float

SPACING · 4 PX BASE

space.1	4 px
space.2	8 px
space.3	12 px
space.4	16 px
space.6	24 px
space.8	32 px
space.12	48 px
space.16	64 px

RADII

radius.sm	6 px	Checkboxes, small chips
radius.md	8 px	Buttons, inputs
radius.lg	12 px	Cards
radius.xl	20 px	App windows
radius.2xl	24 px	Companion panel
radius.tile	26%	App tiles
radius.full	999 px	Pills, avatars

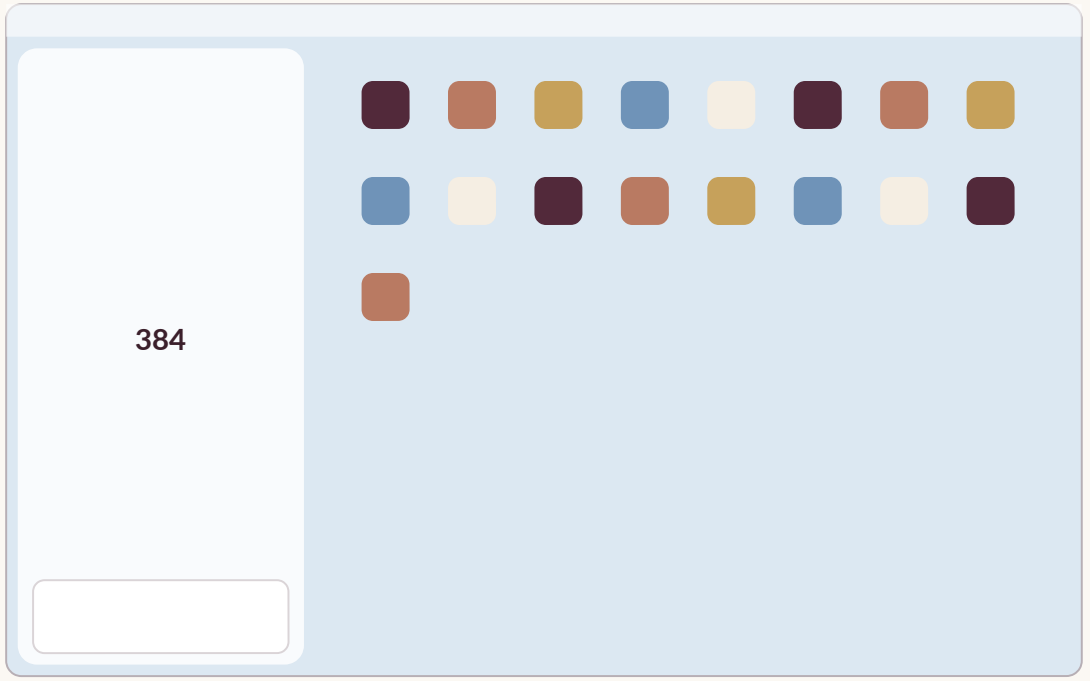

ELEVATION

elev.0	Flat: rows, inline items
elev.1	Cards: y 1, blur 4, 8%
elev.2	Windows, panel: y 5, blur 28, 12%
elev.3	Dialogs, incident: y 12, blur 48, 18%

Glass

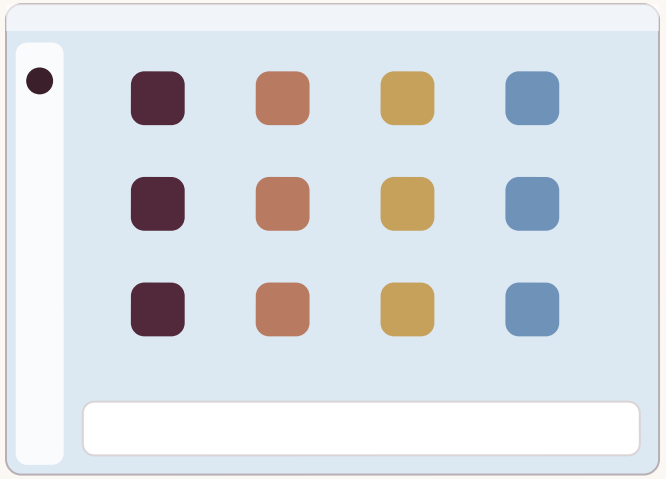

White 80% over blur 30, 1 px white 60% border

Three layouts, one app; Simple Mode is the same at every width

Desktop · 1024 px and wider

- Top bar 44 px · companion panel 384 px fixed, inset 16 px · content fluid with 16 px gutters.
- App grid: 64 px tiles on a 118 px pitch; 8 columns at 1440, 6 at 1024.
- App windows open in the content area as tabs; max content width 1200 px.

Tablet · 640 to 1023 px

- Panel collapses to a 72 px rail with the lotus.
- “Say something” docks at the bottom.
- Grid keeps 4 columns.

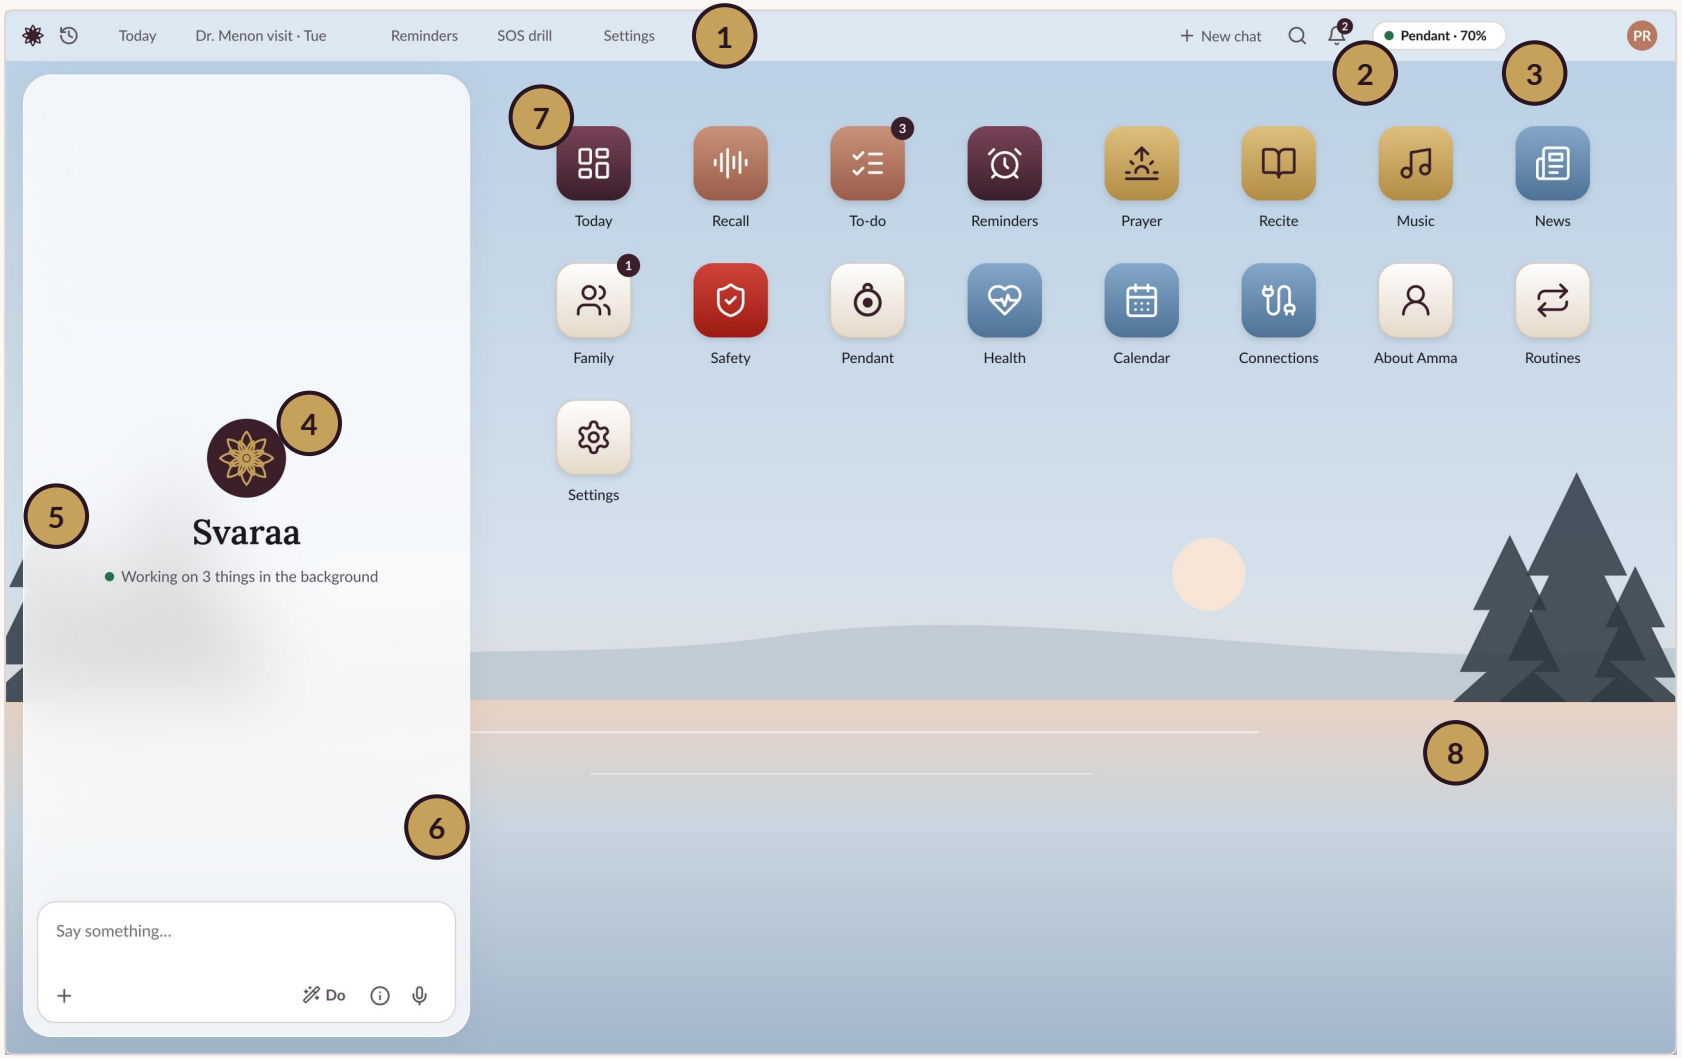

Phone · under 640 px

- Bottom nav: Today, Talk, Apps, Alerts.
- Grid becomes a list; tabs become an “Open” sheet.
- Safe-area insets respected.

SHELL ANATOMY

A calm desktop: talk on the left, apps on the right

1 **Tabs**

Every app or record opens as a tab; a red tab is a live incident.

2 **Search and bell**

Global search; bell groups Safety, Reminders, Device, Recall, Family.

3 **Pendant chip**

Always visible: connection, battery, mute, and red while recording.

4 **Companion**

The same assistant the wearer hears, scoped to your role.

5 **Background work**

“Working on N things” opens the live job list.

6 **Composer**

Type or speak; + attaches, Do proposes actions for your OK.

7 **App grid**

Fixed order, drag to rearrange; badges show counts.

8 **Wallpaper**

Mood only; nothing on it carries information.

One primary action per view; red only for safety

	DEFAULT	HOVER	PRESSED	FOCUS	DISABLED
Primary	Mark taken	Mark taken	Mark taken	Mark taken	Mark taken
Secondary	Mark taken	Mark taken	Mark taken	Mark taken	Mark taken
Tertiary	Mark taken	Mark taken	Mark taken	Mark taken	Mark taken
Safety	I'm on it	I'm on it	I'm on it	I'm on it	I'm on it

SIZES

Call Amma
sm · 32 px

Call Amma
md · 40 px (44 hit)

I'm on it
lg · 48 px

Call Amma
xl · 64 px

lg is the incident CTA; xl is Simple Mode. Labels are verbs: "Call Amma", not "OK".

CONTROLS

Tab live dot

RULES

- Chips are 24 px tall on web, 40 px in Simple Mode.
- Every coloured chip also has a word or icon.
- A chip is never the only way to act; it links to the thing it describes.
- Badges cap at 9+; Safety uses a red ring, never a count.

One problem, one card, one primary action

Blood-pressure tablet not acknowledged

1:00 pm dose · 40 min ago · family told at 1:30 pm

Call Amma | Mark taken | Snooze 30 min

Attention card · clears when the state clears, never by dismissal alone

8:10 am — **Phone call with Ravi**

14 min · 2 action items

Ravi visits on 12 Oct; bring the scan report to Dr. Menon

Timeline row · pendant time, dot in the event's family colour, summary line for sessions

Buy Amlodipine refill — RA Ravi

9:00 am Blood-pressure tablet · Amlodipine

daily · important · tells family after 30 min — ✓ Taken 9:02

Action item row and reminder row · 48 px tall, 16 px padding

BANNERS · TOP OF THE APP WINDOW

Possible fall · Amma · 3 min ago — Open incident →

Pendant not connected since 1:10 pm. Reminders still fire on the pendant. — How to fix →

Summaries are delayed. Safety alerts are not affected. — Details →

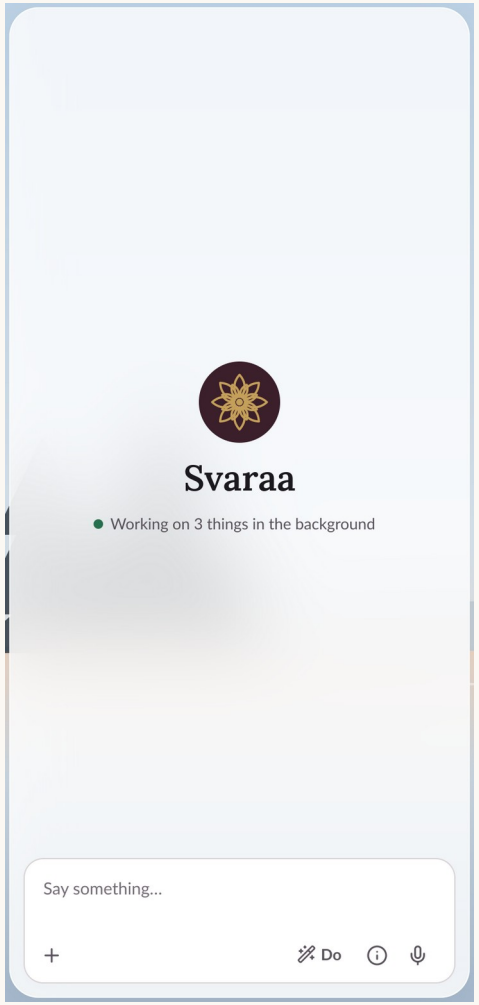

Drill passed · Priya acknowledged in 48 s. — See drill →

Svaraa now uses Sarvam for Tamil speech. — Learn more →

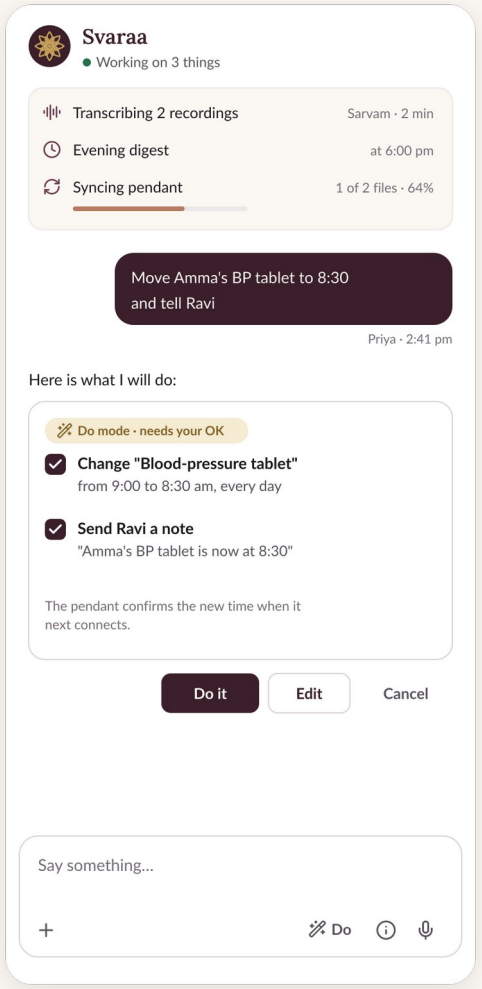

Safety banners pin above everything until someone acknowledges. Others stack below, newest first, at most two visible.

COMPANION PANEL

Ask anything; nothing changes until you say “Do it”

Idle

Conversation · Do mode

1 Header and job list

Lotus avatar and “Working on N things” with the breathing dot; expands to live jobs with progress, provider and time left.

2 Messages

Yours in aubergine bubbles, right aligned. Svaraa replies as plain text on the panel, with links to the source session or reminder.

3 Do mode card

Gold “needs your OK” tag, a checklist of exact changes, then Do it · Edit · Cancel. Unticking an item drops it from the plan.

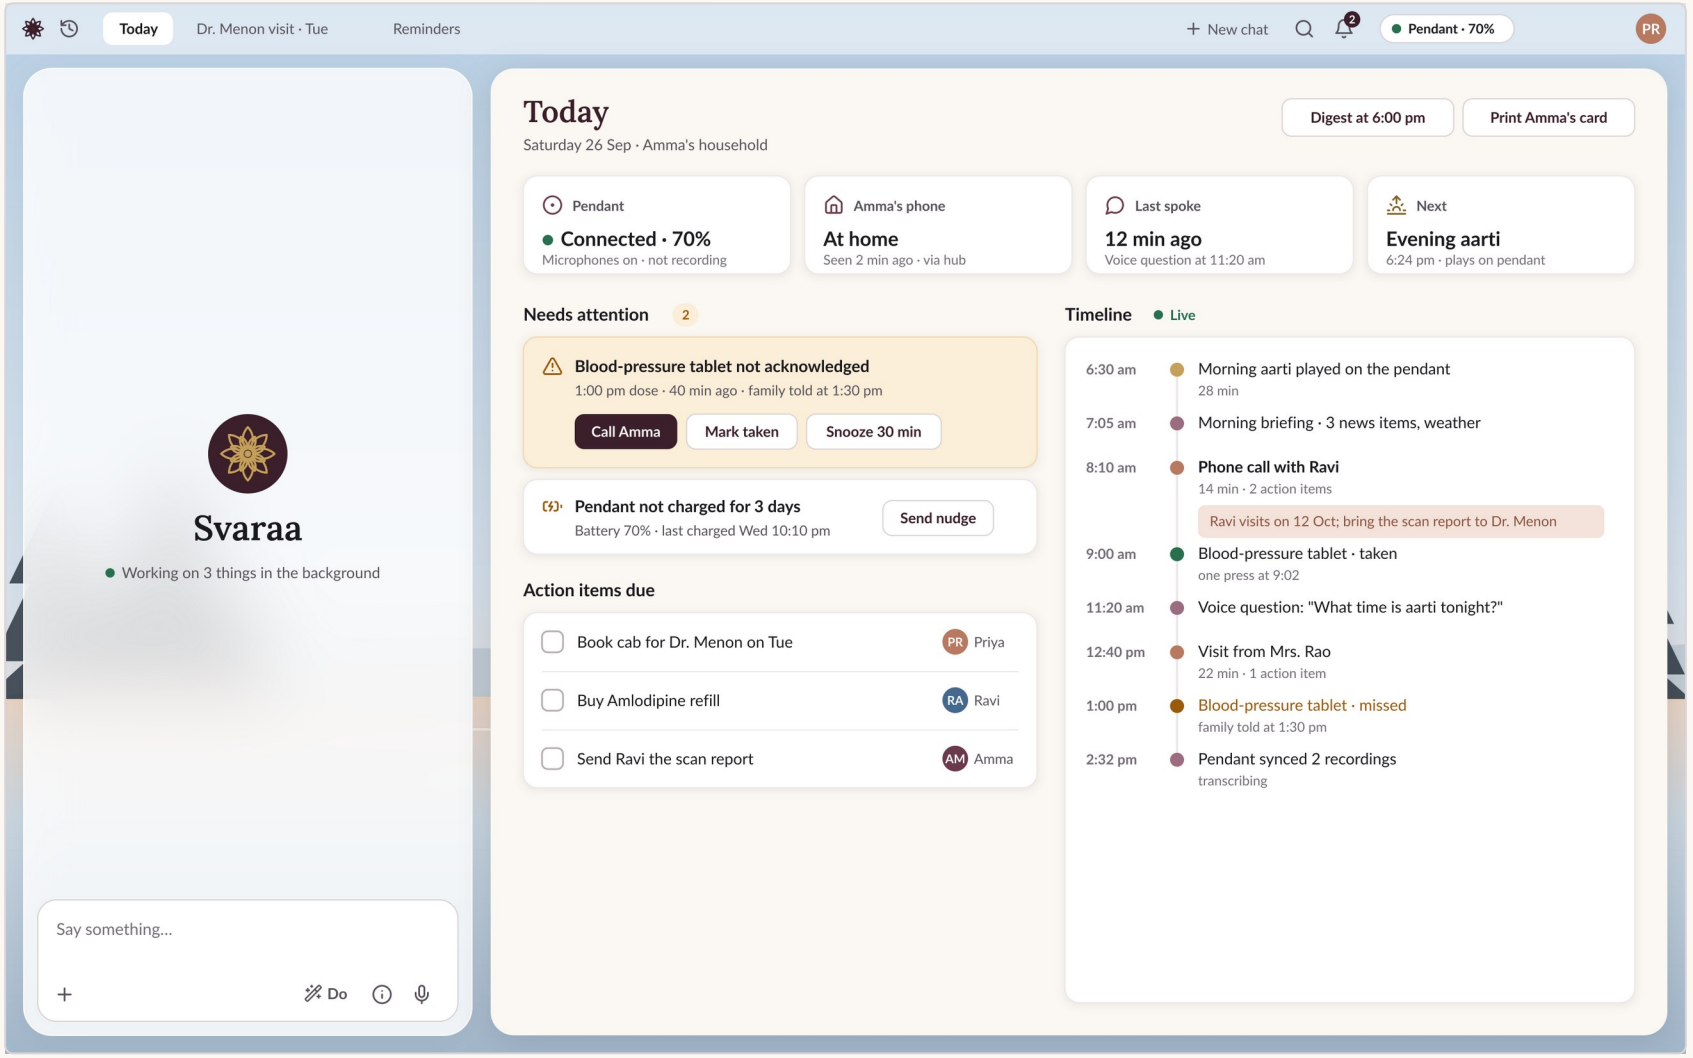

4 Composer

104 px tall, “Say something…”. + attaches a photo (a prescription proposes reminders); Do switches mode; the mic uses the same voice pipeline.

5 Scope

The same assistant the wearer hears, limited by role: a Viewer can send a voice note but cannot read transcripts or change reminders.

Today answers one question: is Amma alright, and what needs me?

1 Status strip

Four facts: pendant, phone, last spoke, next. “Seen” turns amber at 30 min, red at 2 h.

2 Needs attention

Amber cards, one primary action each; they clear only when the state clears.

3 Action items

From sessions and family; the avatar shows who owns it.

4 Timeline

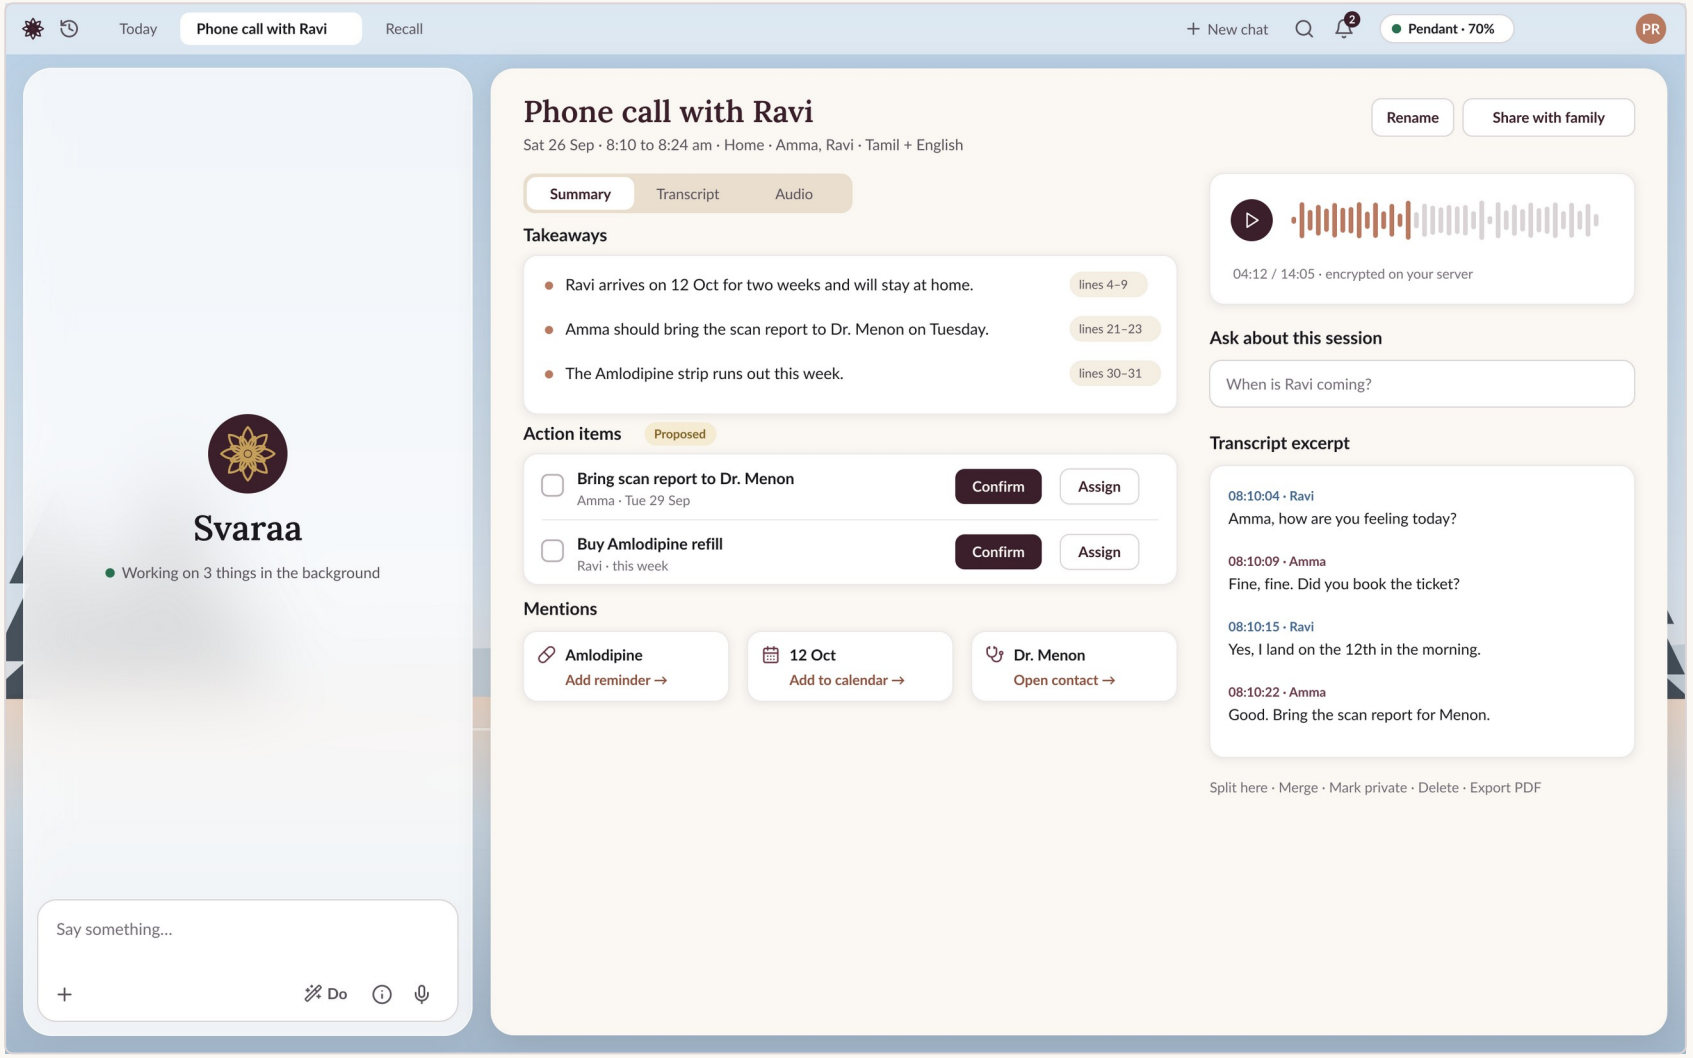

Live, in pendant time; late events slot in with “synced 2 h later”. Viewers see “Conversation, 22 min” with no text.

5 Digest

At 6:00 pm the day becomes a digest for the family; Amma can hear it by asking.

SCREEN · RECALL SESSION

Every takeaway links to the words it came from

1 **Summary, Transcript, Audio**

Summary first; the other two need the wearer's transcript consent.

2 **Takeaways**

Up to five sentences, each with a line reference that opens the transcript there.

3 **Action items**

Arrive as "Proposed"; nothing reaches To-do until someone confirms.

4 **Mentions**

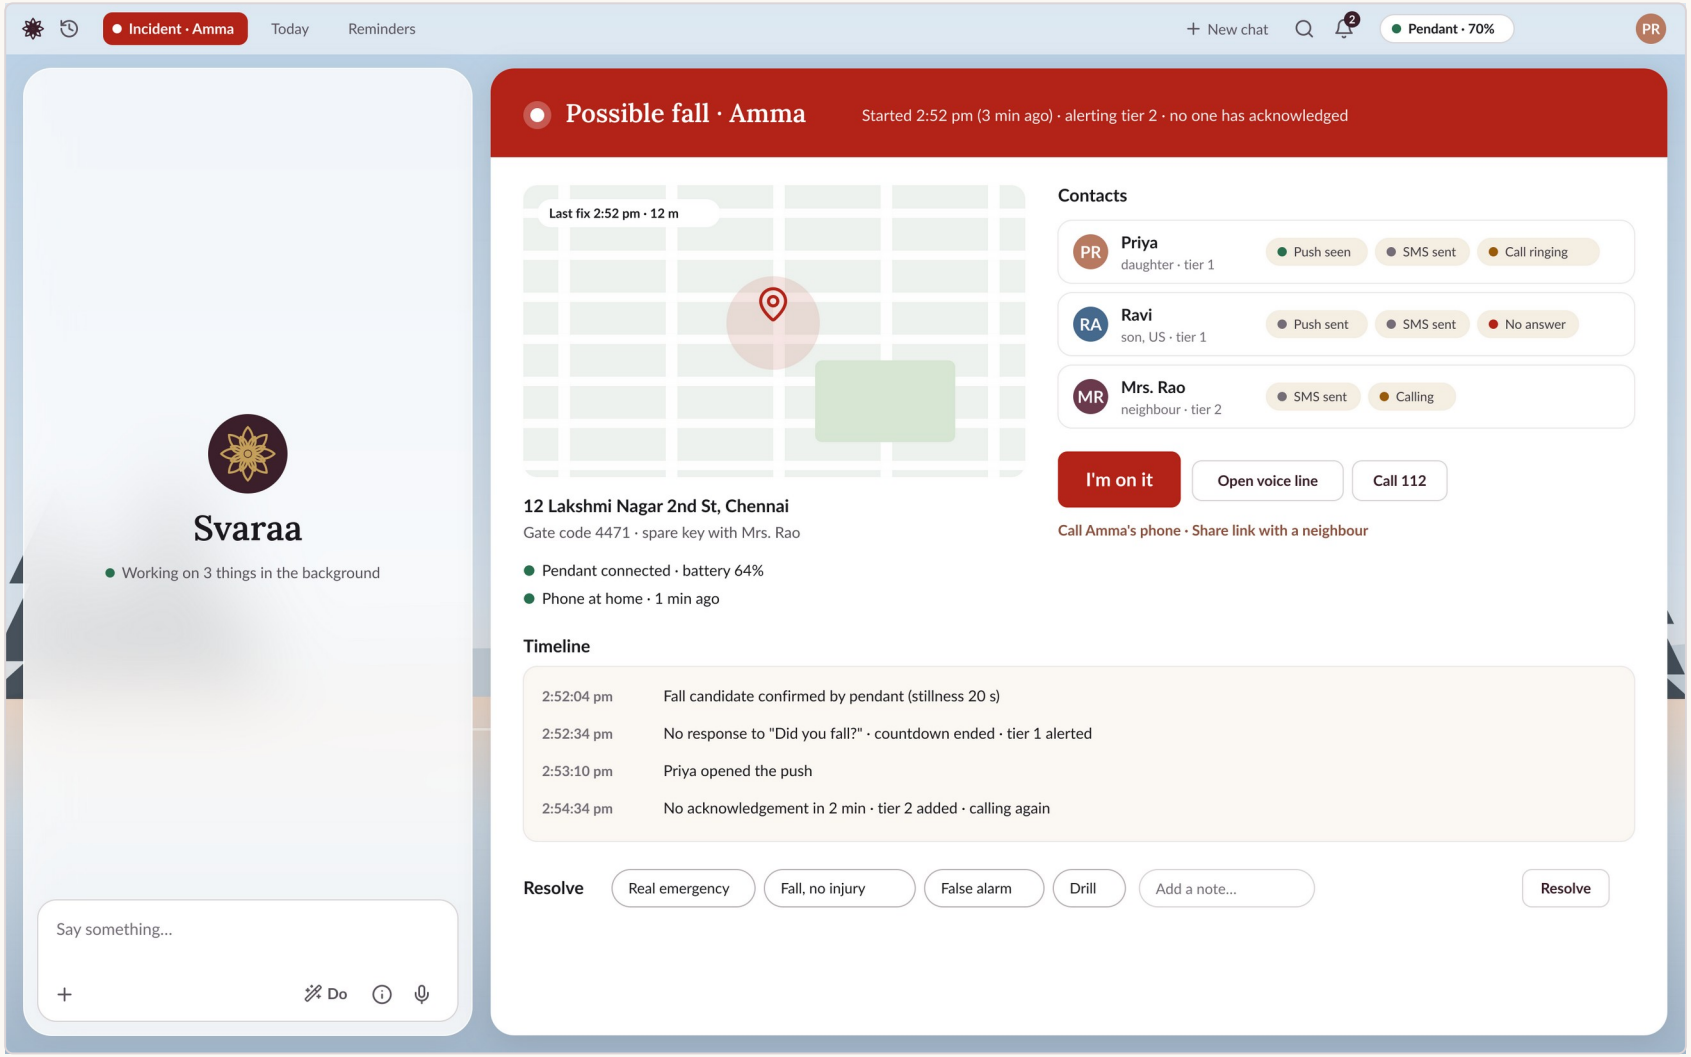

Medicines, dates, people become one-tap suggestions, never automatic changes.

5 **Ask about this session**

Questions answered only from this session, with the lines quoted.

SCREEN · INCIDENT ROOM

Everything a responder needs, on one screen, in the first minute

1 **Banner**

Red, pinned, with a pulsing dot; says what, who, when, and who has not answered yet.

2 **Where**

Map with fix age and accuracy, address, gate code and key holder from About Amma.

3 **Contacts**

Each person's push, SMS and call state, live. The first to acknowledge leads.

4 **I'm on it**

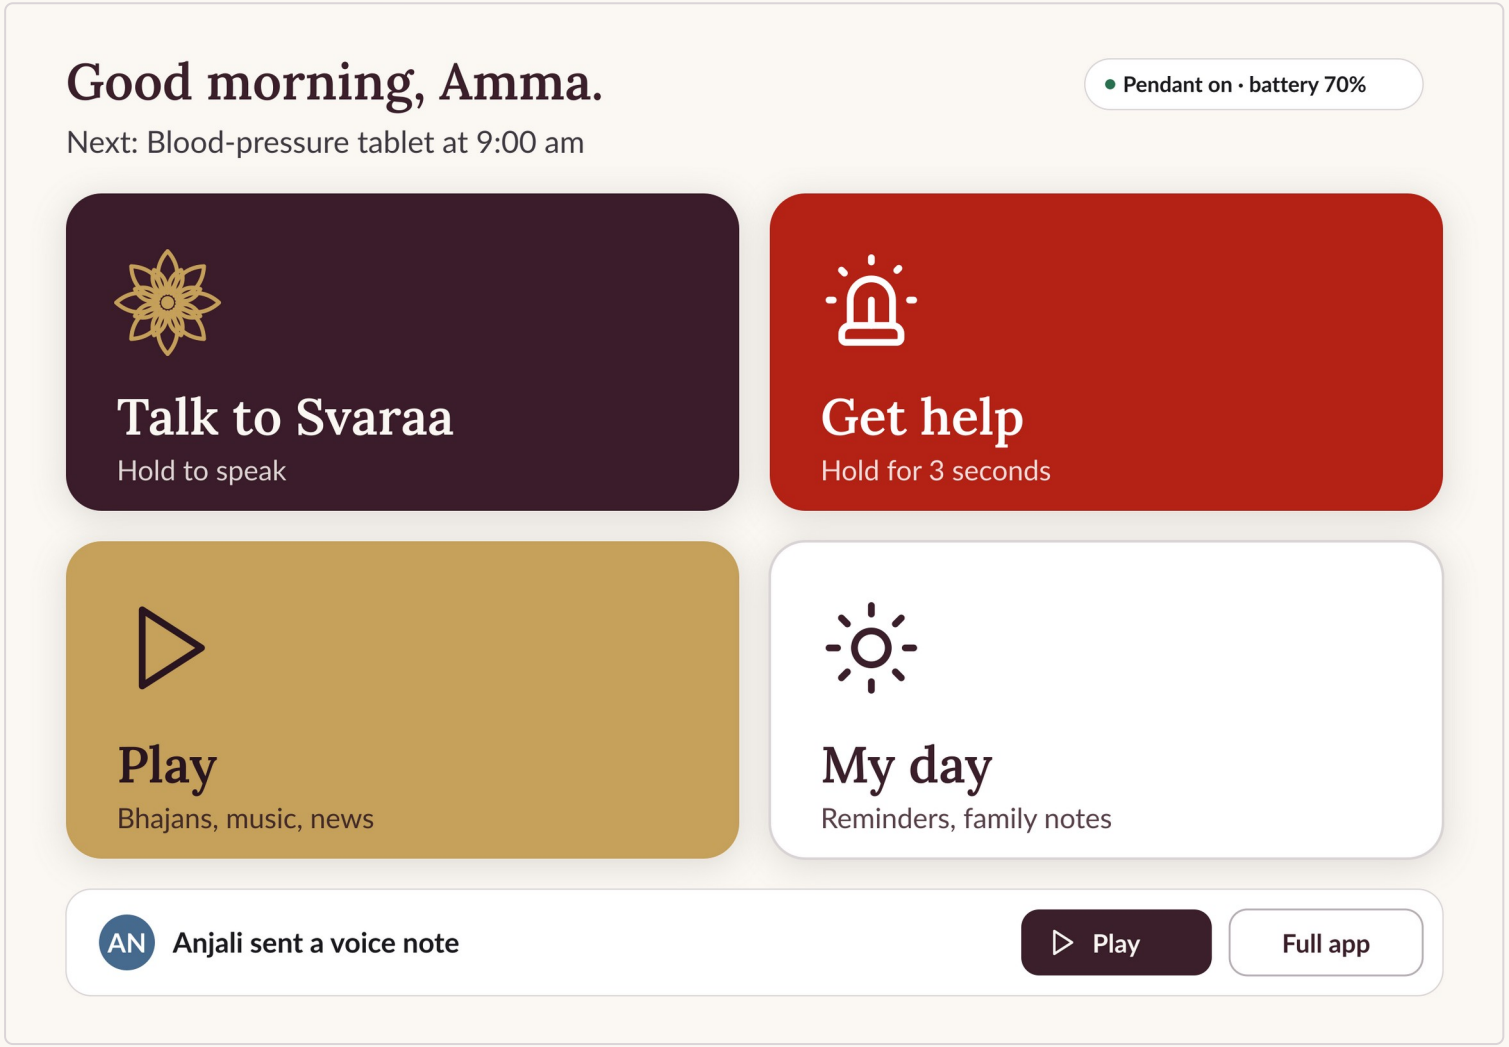

The one red button. Voice line and Call 112 sit beside it, never auto-dialled.

5 **Resolve**

An outcome is required; three false falls in 30 days prompt a sensitivity review.

SCREEN · SIMPLE MODE

Four tiles, big words, nothing to learn

1. **Greeting and next**
   A Lora greeting, the next reminder in 24 px, and the pendant state in words.

2. **Talk and Get help**
   Tiles mirror the pendant: hold to speak, hold 3 s for help, with the same countdown.

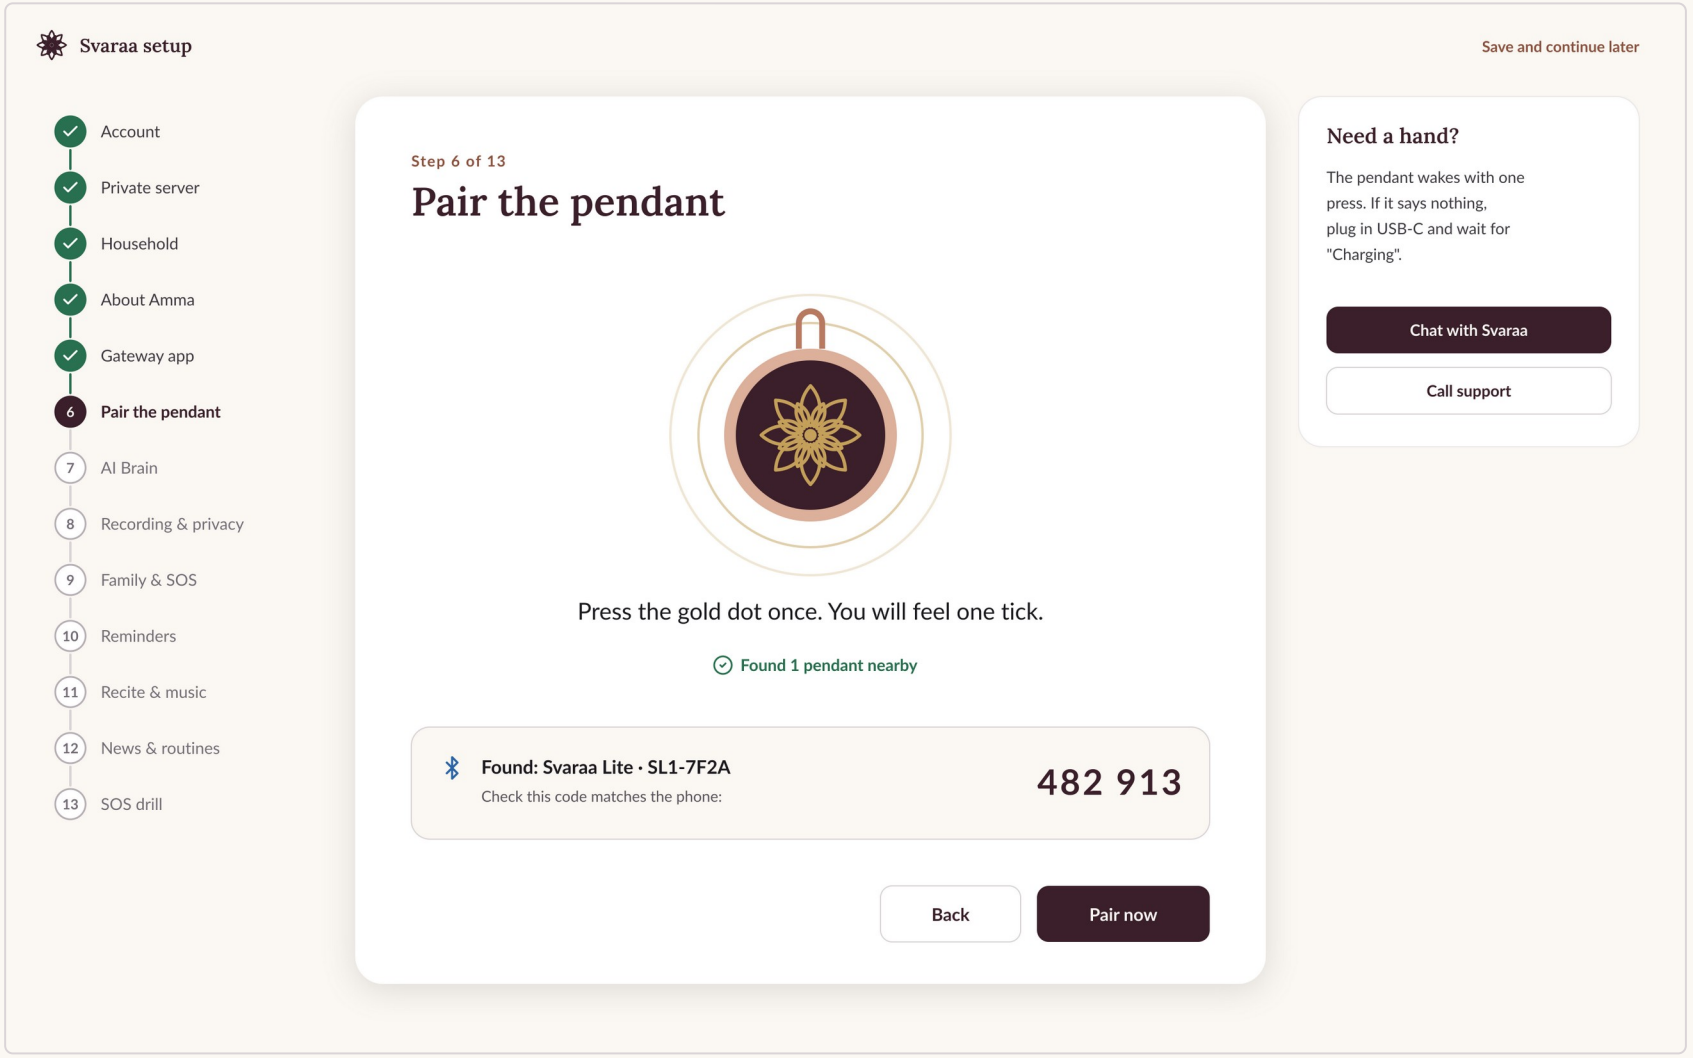

3. **Play and My day**
   Bhajans, music and news; reminders and family notes read aloud on tap.

4. **Family strip**
   The newest voice note with a 64 px Play button. “Full app” is always one tap away.

5. **Rules**
   22 px base, 64 px targets, no wallpaper, no timeouts, light theme unless chosen.

SCREEN · ONBOARDING

Thirteen steps, saved as you go, finished by a real SOS drill

1 **Step rail**

Done steps turn green; any step can be revisited; progress saves automatically.

2 **One job per step**

Lora title, one illustration, one sentence of instruction.

3 **Confirm what matters**

Pairing shows the numeric code to compare; the hardware test checks tick, voice and mic.

4 **Help beside every step**

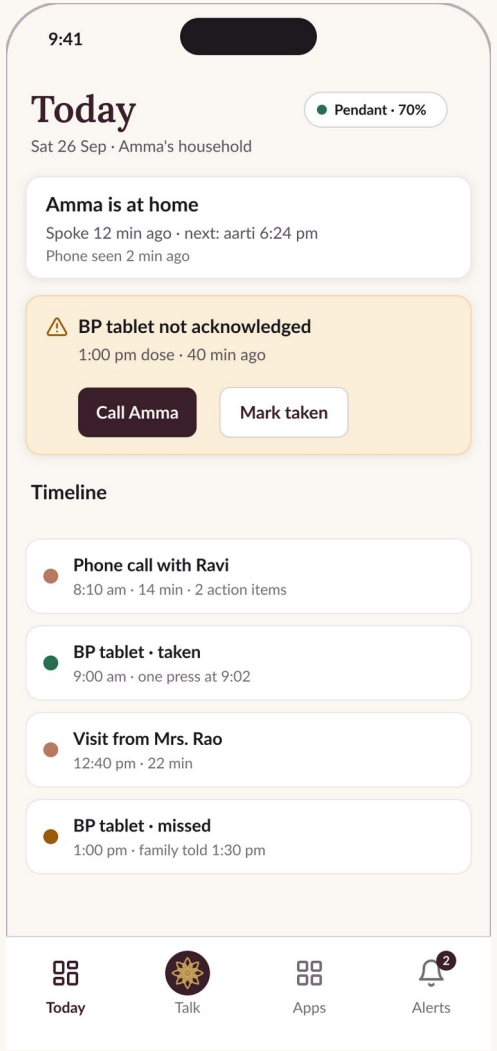

Chat with Svaraa or call support without losing your place.

5 **Finish line**

Ends only after a drill reaches a real phone; skipped steps become Today tasks.

SCREEN · PHONE

The same Today, one column, thumbs first

1. **One column**

   Status card, attention cards, then the timeline; the same components as desktop.

2. **Bottom navigation**

   Today, Talk (the lotus opens the companion full screen), Apps, Alerts with a count.

3. **Thumb reach**

   Primary actions sit in the lower half; buttons 40 px tall with 8 px gaps.

4. **Gateway webview**

   The Gateway app shows this same web app; native only for Bluetooth, GPS and alerts.

MOBILE RULES

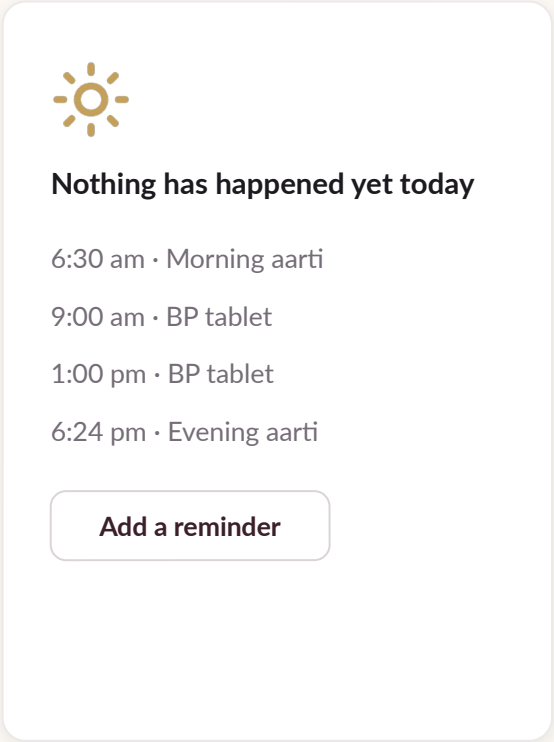

- Works on a 3 GB RAM Android phone and the last two years of Safari and Chrome.
- First load under 4 s in the Gateway webview.
- Incident opens full screen from the push, skipping the app shell.
- Simple Mode is the default on the wearer's own phone.

STATES

Every app has the same four states

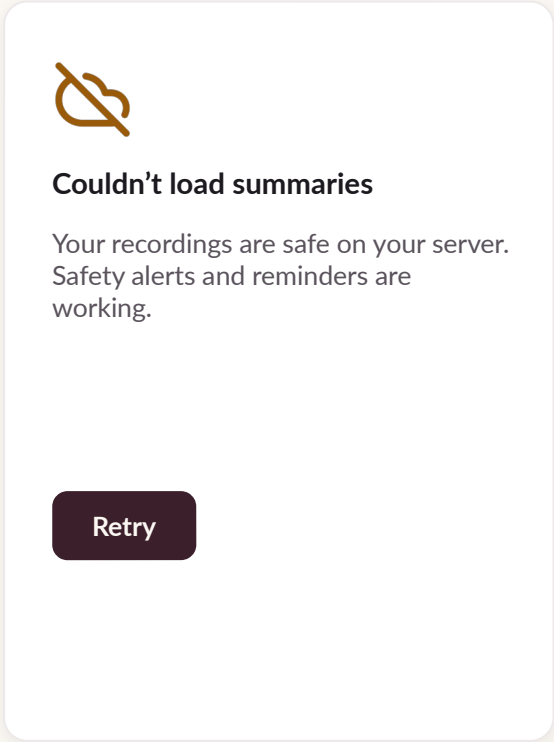

Loading

Skeleton in the shape of the content; never a spinner alone.

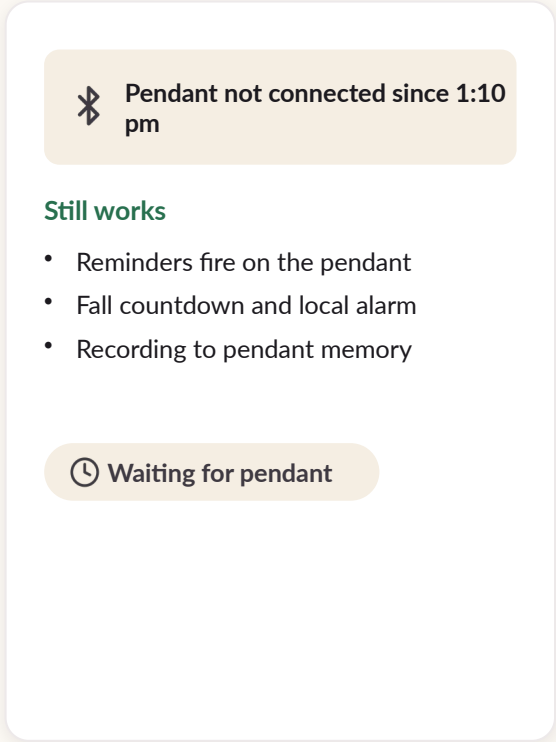

Empty

Show the plan for today in grey; one action to add something.

Error

Say what failed and what still works; one Retry.

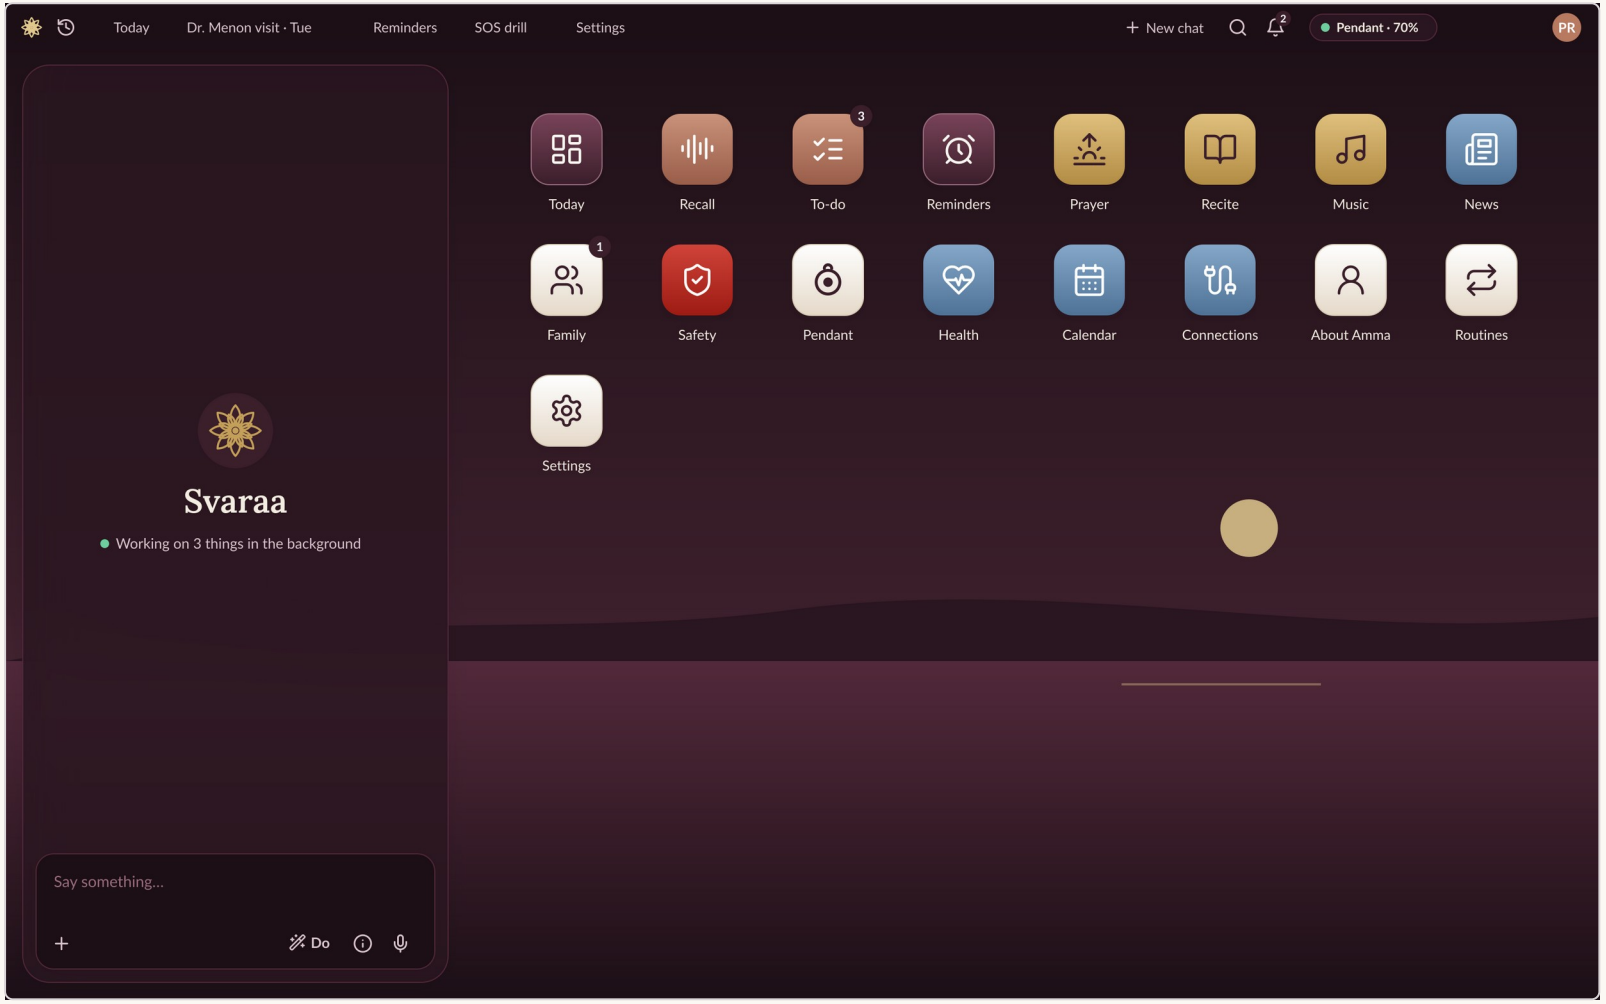

Pendant not connected

Explain what still works; show "Waiting for pendant" instead of failing.

DARK MODE

Aubergine night, not black; gold stays gold

1 **Canvas**

Aubergine 950 #1C0F16; surfaces aubergine 900. Never pure black.

2 **Primary action**

Lotus gold 300 with aubergine 950 text (11.5 : 1).

3 **Status**

Dark variants: green #6FCF9F, amber #F2B55C, red #FF8A7A.

4 **Tiles**

Care tiles gain a 1 px aubergine 400 edge so they don’t melt into the night.

5 **When**

Follows the system setting with a per-user override; Simple Mode stays light unless the wearer chooses dark.

ACCESSIBILITY

Built for older eyes, hands and ears first

Contrast

AA for all text (4.5 : 1), 3 : 1 for icons and large text. Pairings on slide 14.

Targets

44 px on web, 64 px in Simple Mode, 8 px between targets.

Focus

2 px aubergine ring with a 2 px offset (gold 300 on dark); never removed.

Screen readers

Every tile, chip and icon button labelled; incidents announced assertively, the rest politely.

Motion

Honours reduced motion; nothing flashes more than 3 times a second.

Language

UI in English, Hindi and Tamil at launch; spoken language set separately from UI language.

Hearing

Transcripts for every voice note; vibration-first reminders; hearing-aid audio routing.

Vision and memory

Text scales to 200%; one task per screen in Simple Mode; no timeouts on the wearer's screens.

CONTENT FORMATS

Write it the way the family says it

Item	Rule	Write	Not
Time	12-hour, lowercase am/pm, no leading zero	**9:00 am · 6:24 pm**	~~09:00 AM~~
Date	Weekday, day, month; year only when not this year	**Sat 26 Sep · Tue 29 Sep**	~~26/09/2026~~
Relative time	“N min ago” up to 59 min, then the time	**12 min ago · 1:10 pm**	~~a few moments ago~~
Duration	min and h	**14 min · 1 h 20 min**	~~00:14:05 (audio player only)~~
Battery	Percent, plus meaning when it matters	**70% · about 3 days left**	~~0.7, “Battery low!”~~
People	Chosen name; relation once per screen	**Amma · Priya (daughter)**	~~the user, the senior~~
Counts	Numerals on screen, words when spoken	**2 action items · “two things to do”**	~~Two (2) action items~~
Numbers	Locale grouping	**1,20,000 (en-IN) · 120,000 (en-US)**	~~Mixed grouping~~
Languages	Their own name, then English	**தமிழ் Tamil · हिन्दी Hindi**	~~ta, hi~~
Case	Sentence case everywhere	**Needs attention**	~~Needs Attention~~

Times are always the wearer’s time zone; family members in another zone see their own time in grey beside it.

HANDOFF

Tokens, files and the next three checks

```
:root {
  --sv-color-bg-canvas: #FBF8F3;
  --sv-color-bg-surface: #FFFFFF;
  --sv-color-text-primary: #1C1A1F;
  --sv-color-action-primary: #3B1F2B;
  --sv-color-status-safety: #B42318;
  --sv-font-display: "Lora", Georgia, serif;
  --sv-font-ui: "Lato", "Noto Sans", system-ui;
  --sv-radius-card: 12px;
  --sv-space-4: 16px;
  --sv-motion-standard: 200ms cubic-bezier(.2,0,0,1);
}
[data-theme="dark"] {
  --sv-color-bg-canvas: #1C0F16;
  --sv-color-action-primary: #E2C98F;
}
```

NAMING

sv . category . role . variant e.g. sv.color.status.safety

DELIVERABLES

- tokens.json (W3C design tokens) and tokens.css
- Component library with every state on slides 26 to 28
- Lotus mark, lockups and small-size mark: SVG + PNG
- App tiles: 1024 px masters and 64 px exports
- 24 px line-icon set (Lucide subset)
- Three wallpapers, day and night, 2880 px

NEXT CHECKS

1. Test Simple Mode and the voice with five families in the DVT home trial.
2. Tamil and Hindi copy review of every string on these slides.
3. Accessibility audit before the G4 gate in the PRD.

Svaraa

A gentle voice. A family close by.
